Advice for tutors

Advice I would give to a tutor using ePortfolio for the first time, is that you need to factor in a time period for inducting students and your tutors to the ePortfolio system. It's really important that you have practical demonstrations of the ePortfolio system and allow the tutors and the students to have hands-on experience of using it.

It's also useful if you can develop some kind of demonstration site yourself to show the students and the tutors what an ePortfolio looks like, as I think its quite an abstract thing until they actually see it and start working with it.
