### **Advantages for tutors**

It's a big advantage for us in assessment because we don't have to take home boxes of paper based portfolios and I guess as far as we are concerned that's a huge advantage that we can just go online and access these ePortfolio wherever we are and that makes the whole process much more easy in terms of assessing.

A big advantage for us is to be able to put feedback straight into the ePortfolio, the system that we are using allows tutors to put comments in each section of the ePortfolio so that students can actually read their work and link it to the feedback that they receive from us and we all know how important that link and relevance is to students in enabling their understanding of their performance.
